

How I Will Change the World

Picking up litter

Caring for plants

Helping animals

Are just a few ways to change the world

If everyone can pitch in

Then it'll add up

Let's bottle our anger

Like 7-Up

Together we are strong

So, let's use that power

To help each other

And our world

Is slowly changing

Some changes slower than others

And things like Global warming

Aren't going away at this rate

So, we can recycle

And help plant new trees

And that can save butterflies and birds and bees

Who will pollinate flowers

That grow with rain showers

And the chain will keep going on

We can preserve water
By turning it off
When we're brushing our teeth
And save electricity too
Just hit the switch
When you leave the room

See, these little things
They can make a difference
One step at a time
To change the world
